**Complete overhaul of website & app development
from scratch.**

By HackerKernel with love.

When this project was brought to us, it was already an established service, providing its services to thousands of users. But all it needed was

An overhaul to not to just Look & Feel but also to Work like the Next Generation

Eyes are windows to a soul &
Logos are windows to a Brand

We redesigned the Logo
for Elegant & Modern feel

Old Logo

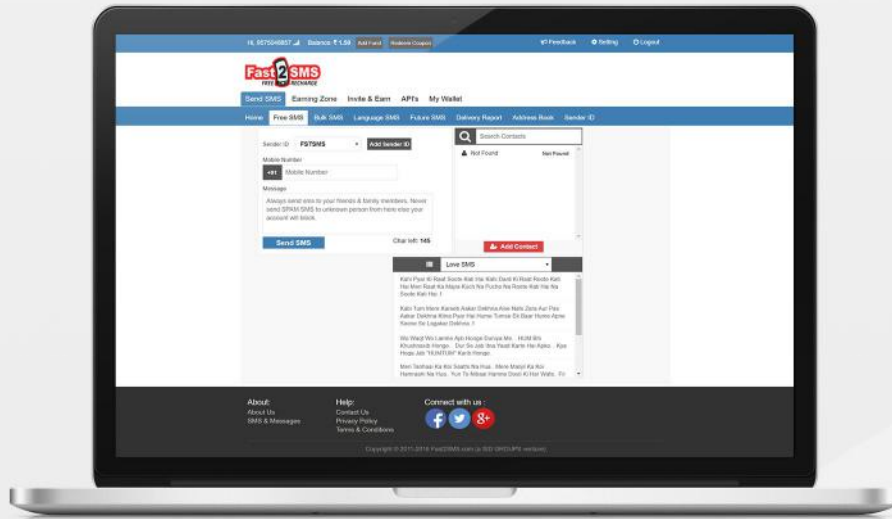

New Logo

UI/UX was its weakest link, it had this vibe of early 90's website.

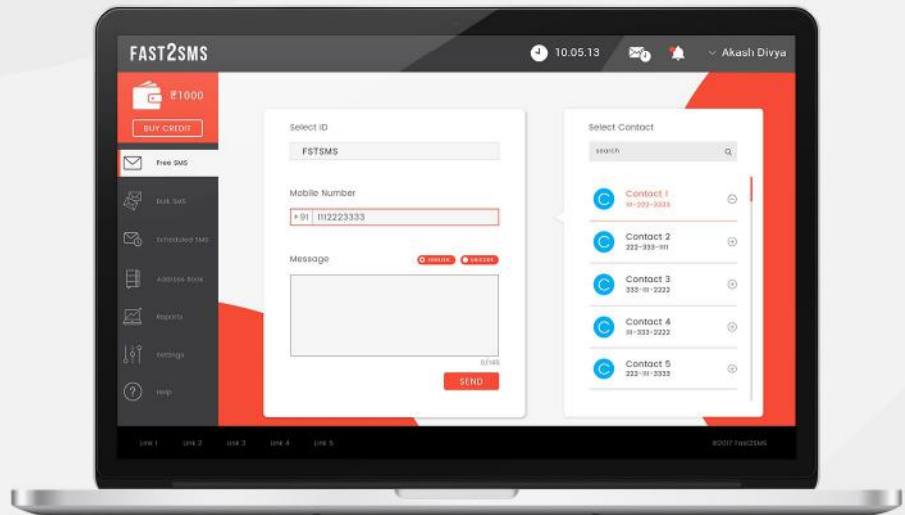

What is the point of having a design, that's not user friendly

We designed it from ground zero
for best User Experience and Clean look

Old Website

New Look

Workflow were designed keeping every aspect & features in mind
for ease of access and to increasing efficiency.

Apps nowadays are one of the most important necessities for success of any brand. It takes mobility to whole another level.

It had no app. So we designed an Elegant Fully Funtioning app for them.

It was built on old technology, and already had thousands of users.
Data was not centralized. It was a mess.

Now it is ready to support Millions
of Users & the data are centralized

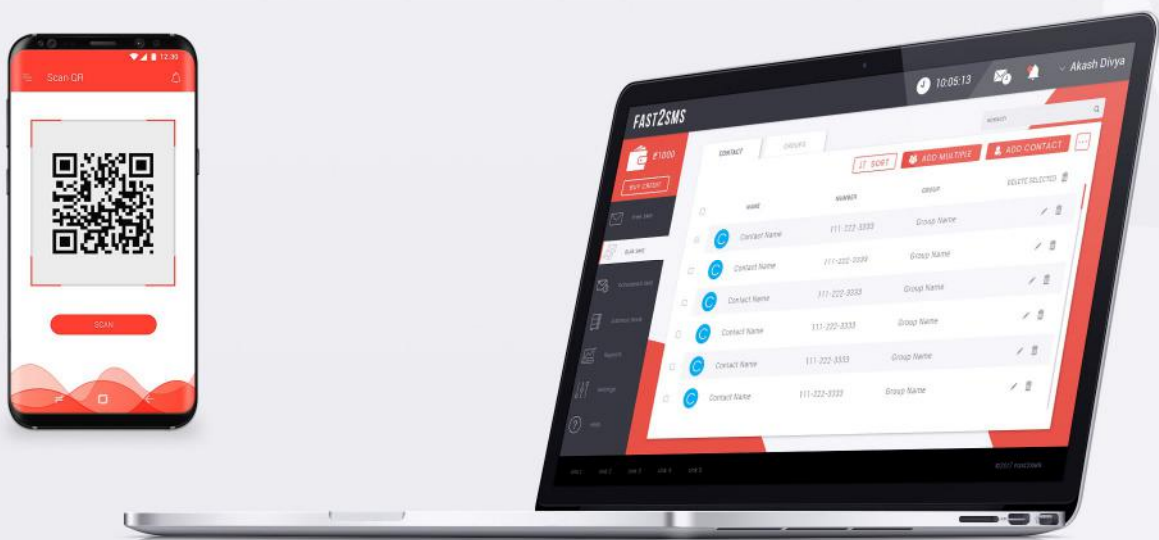

-  Users can send Free SMS
-  Users can send Bulk SMS
-  Users can send Custom SMS
-  Users can send Multimedia SMS
-  Full featured Address Book & Csv Support
-  Easy & Powerful Analytics
-  Full customization support
-  24x7 Helpdesk

Its really a hectic job to save lots of contacts. Right?

But what can we do about it?

With new QR Code Scan feature, just Scan and Contact is automatically saved
