

HackerKernel

madcue

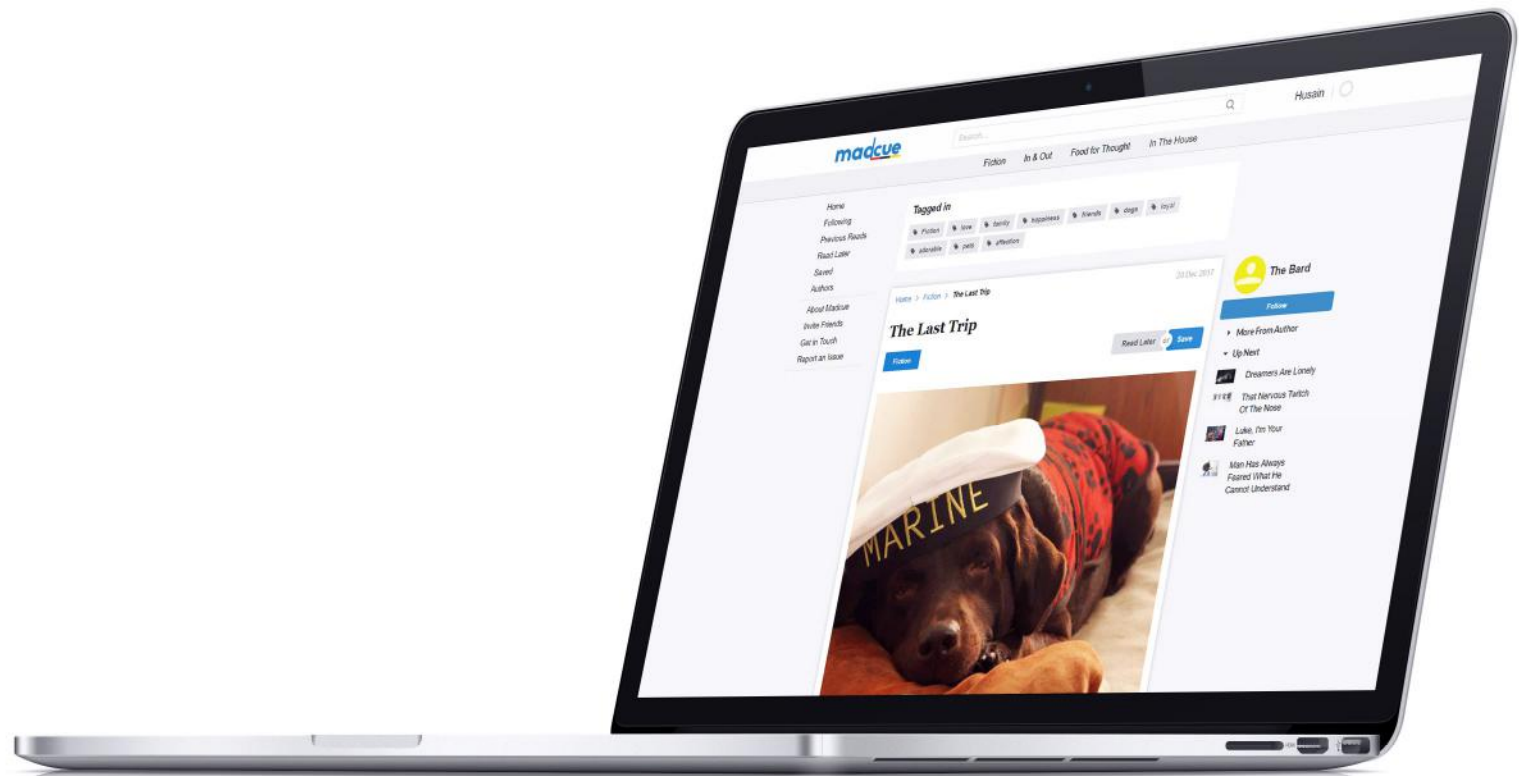

Before we got this project, it was a Wordpress Blog
It had potential but needed a makeover

We transformed it from a Wordpress Blog
to a Web Portal & made it ready for mainstream

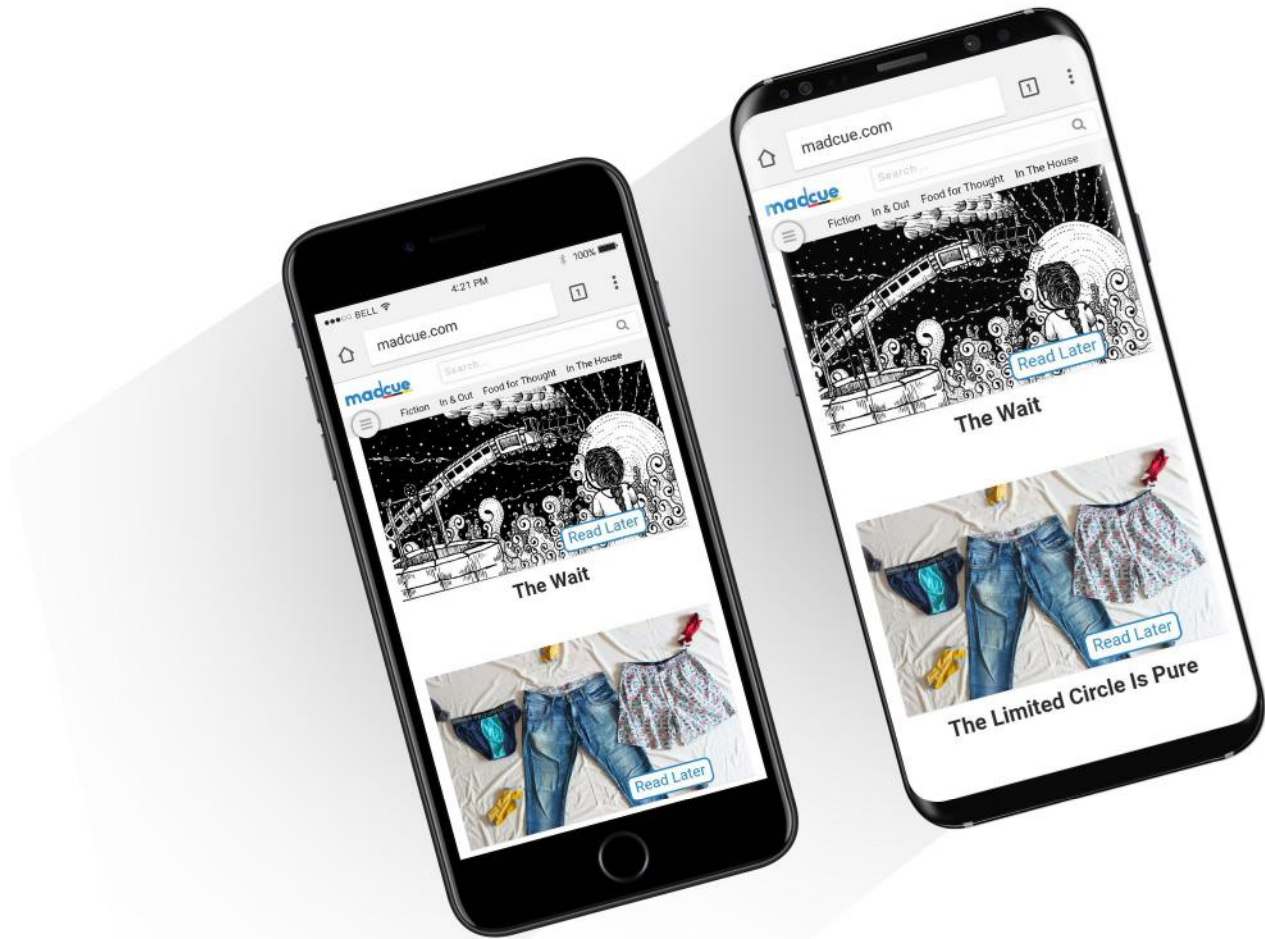

It is a platform for presenting stories to people around the globe
Readers need to have an experience that stays with them. Therefore,

We created a Clean and Simple Design for Best User Experience

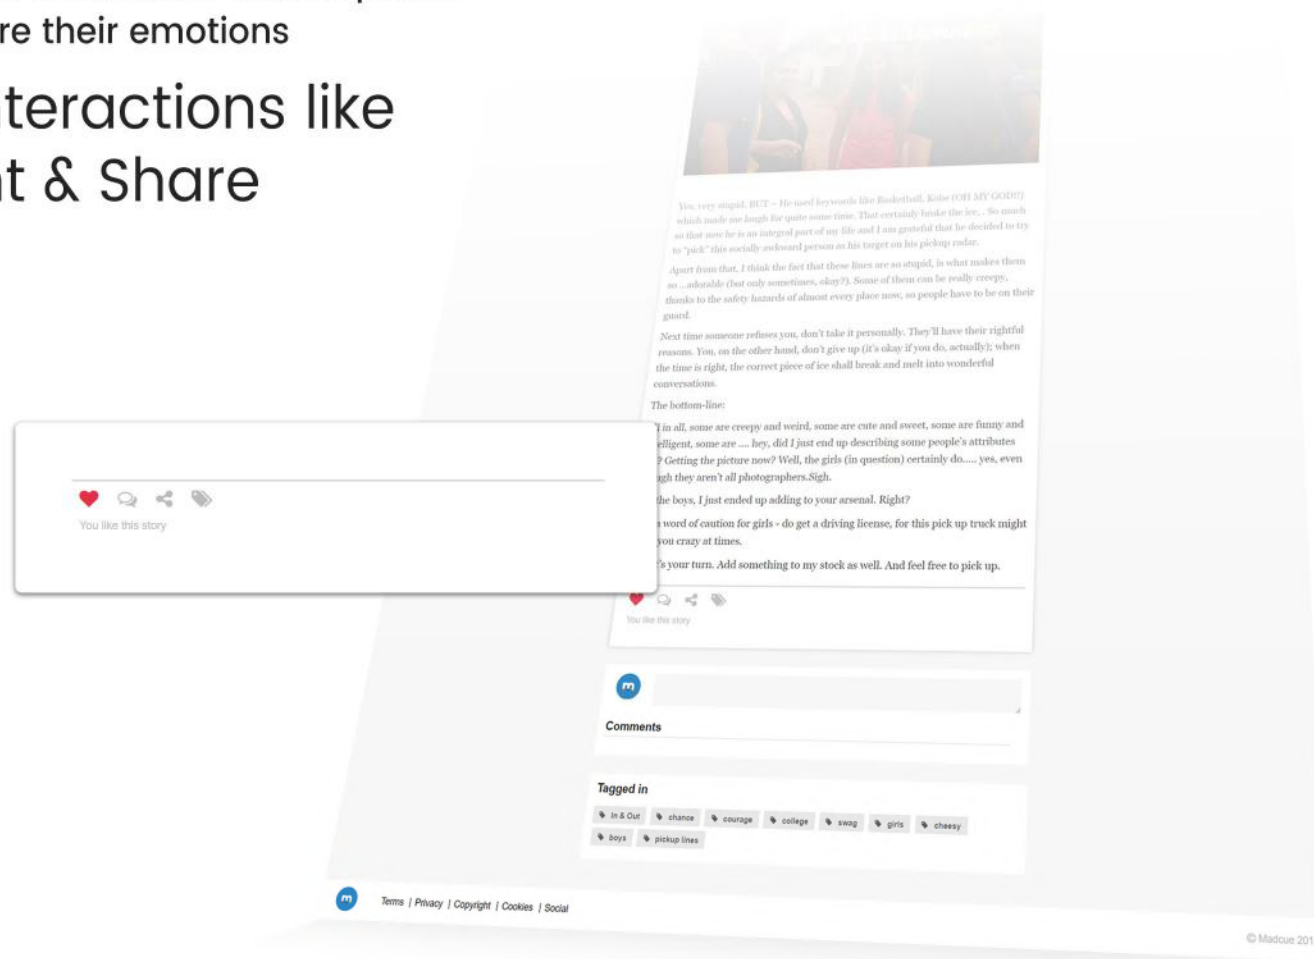

This is new age of technology and no one can deny the importance of smartphone and the mobility it provides

We made it Responsive so that it can be used on Any Device Conveniently

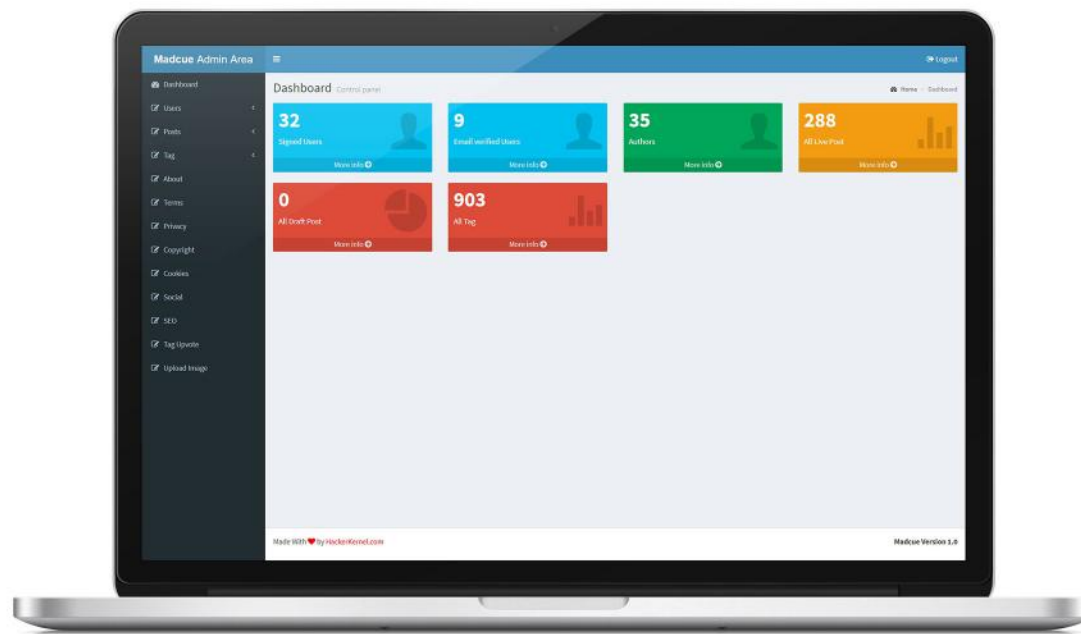

This website is all about interaction and response
User would love to share their emotions

We created interactions like
Like, Comment & Share

Not everyone can add new contents or edit existing contents
Only the legally associated journalists can do that

Admin has power and control of the whole portal
We built a powerful Dashboard to serve this purpose
