

# Prodigee

By HackerKernel with love.

Our education system today needs a complete overhaul  
It is not fit to be implemented anymore

# We built a powerful yet simple Dashboard to revolutionize the Education System

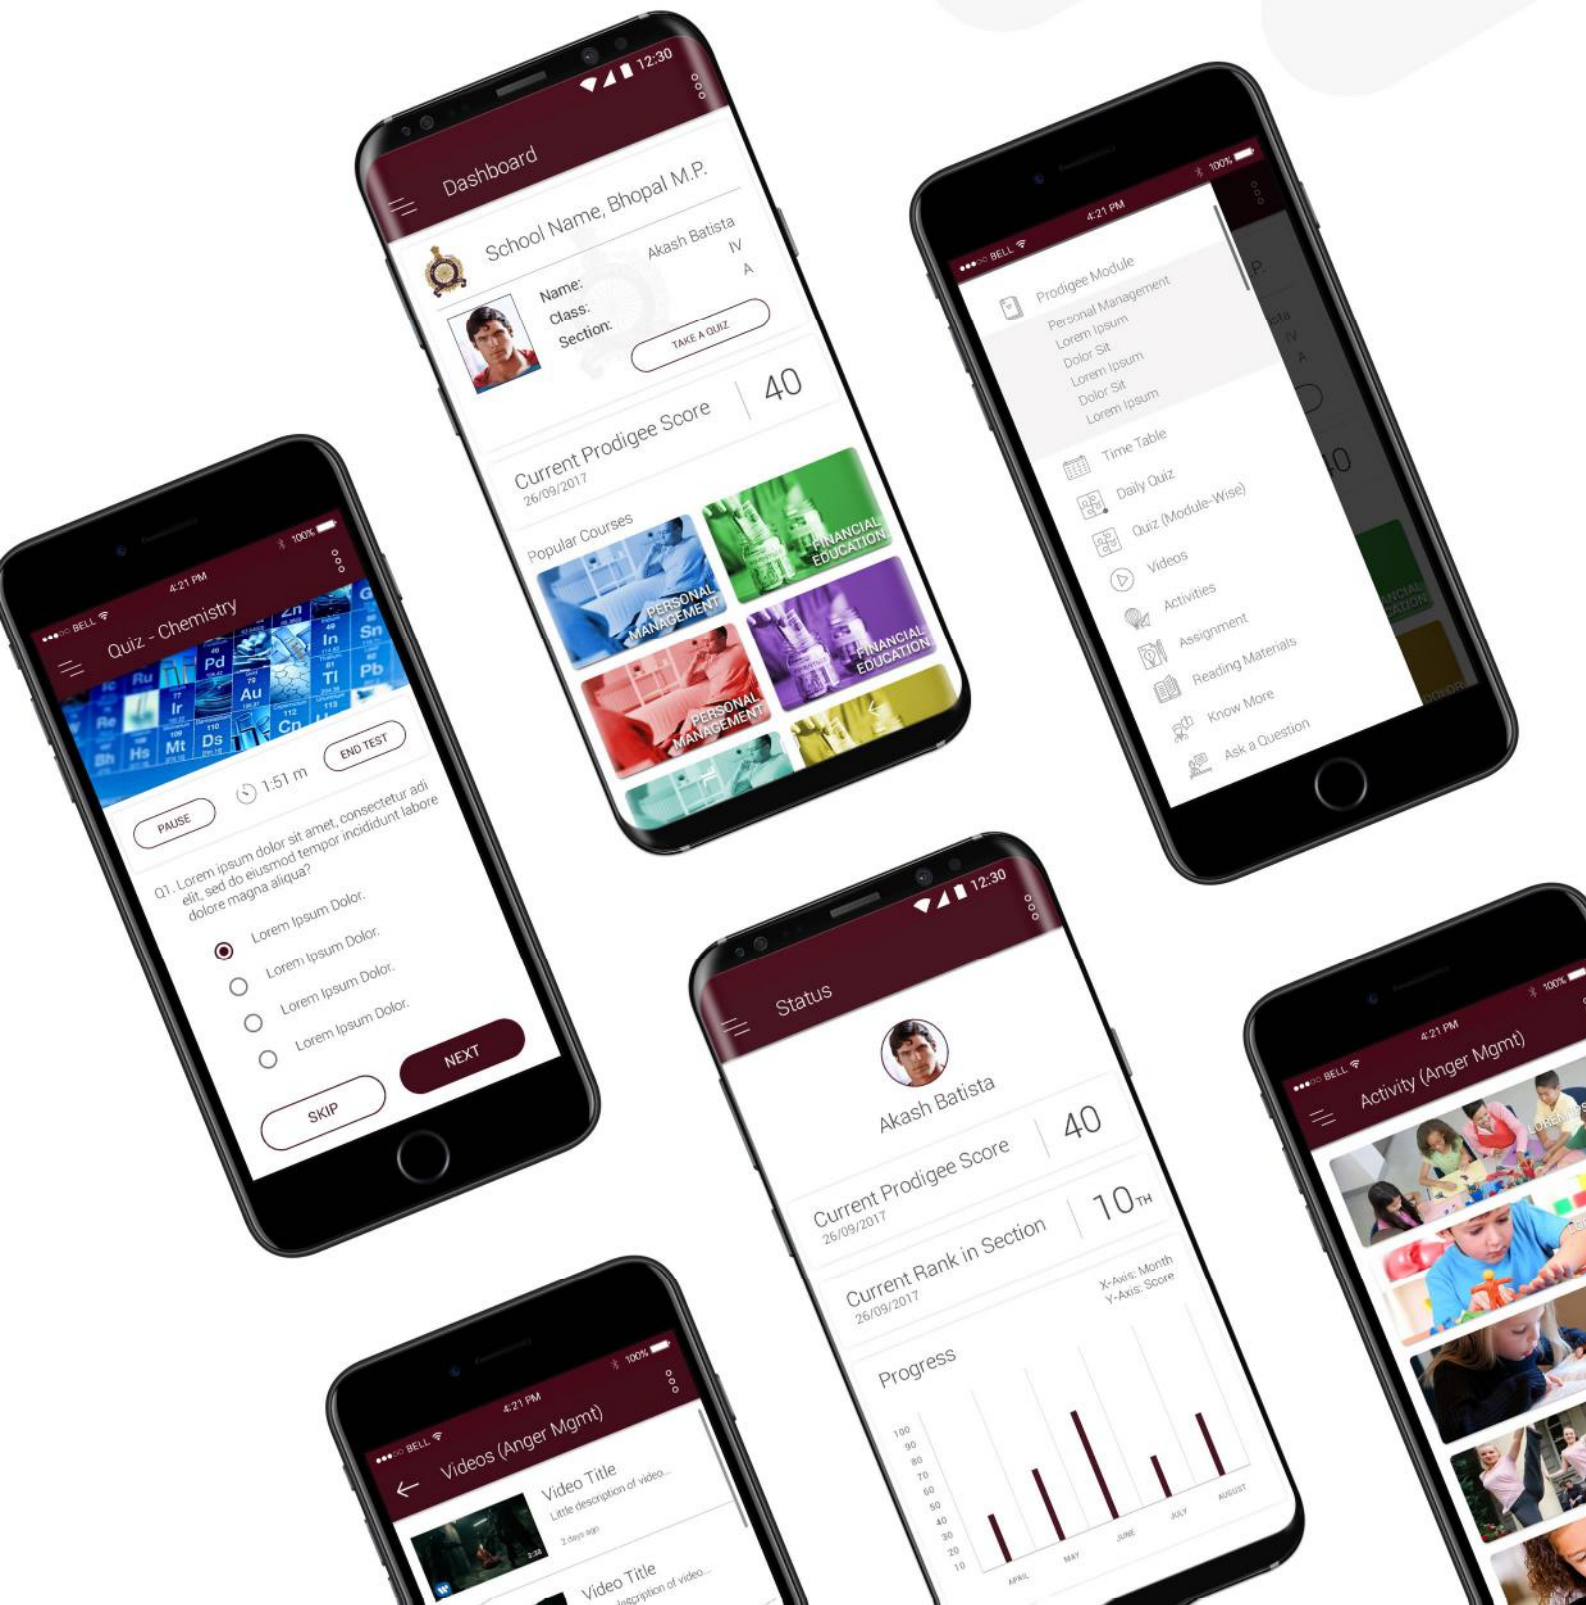

Focussing on providing just the education is not enough, It is also necessary to provide the skills that would ensure all round development of kids.

## We Integrated various Activities along with Curriculum to fulfill the Aim

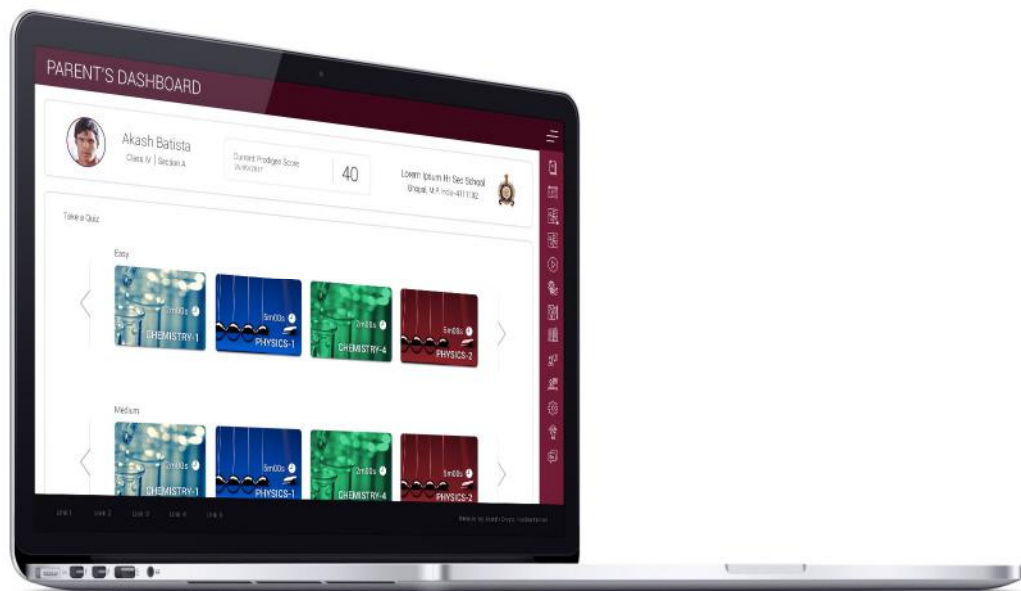

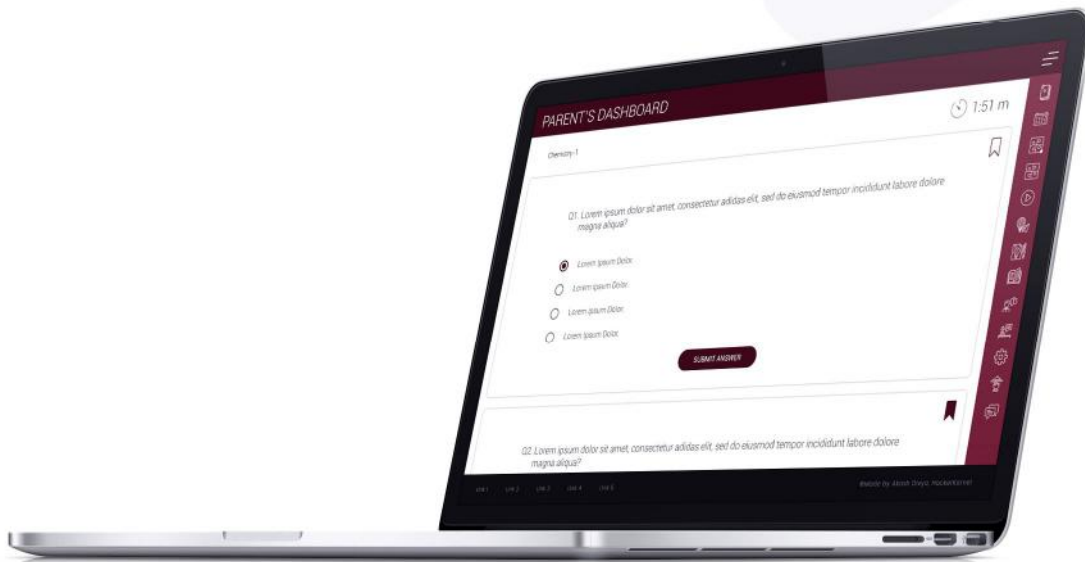

Apps nowadays are very important as they provide mobility and convenience

We built apps for both Android & IOS along with the Web version

What is a better way to test your skills  
and knowledge, than a test at your convenience

We built an effective Multiple Choice Quiz  
section for each topic and difficulty level
