

ZINGFY

It was already an established website, but it was poorly optimized. Who would like to waste their time on a slow website

We rebuilt it from ground zero for better performance and faster results

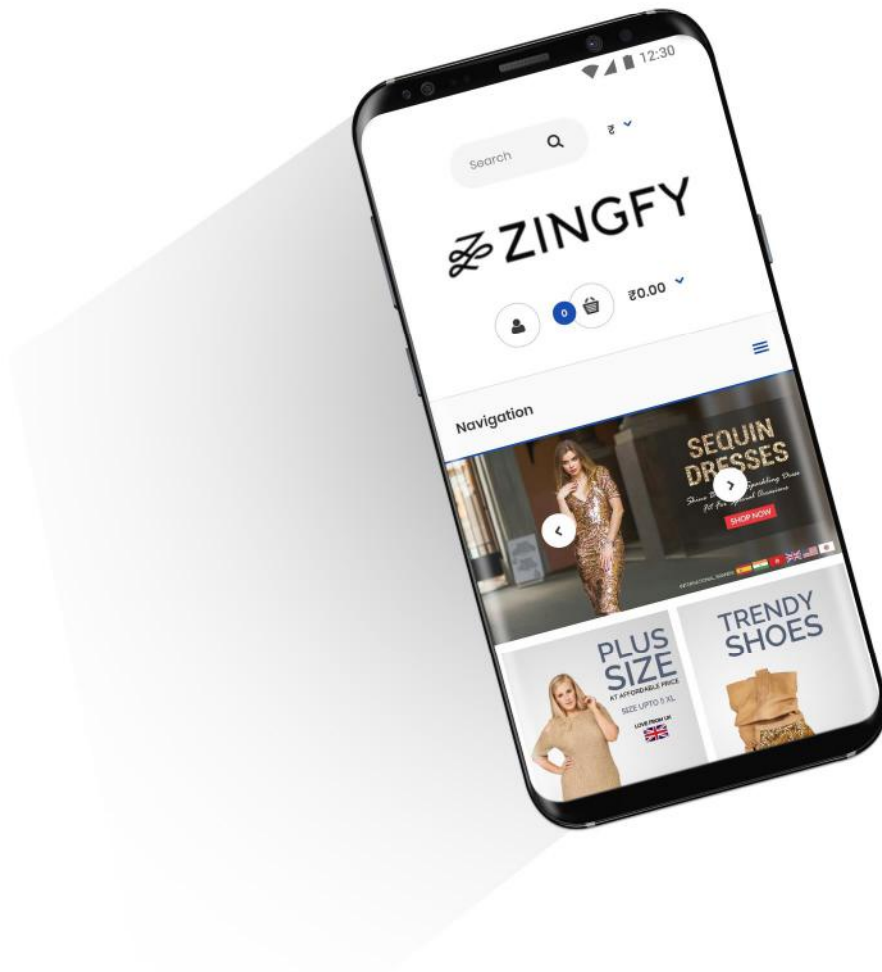

Since the website was too slow, it needed a lot of technical assistance which increased its maintenance cost, with our expertise

We reduced the hosting cost & expenses upto 3/4TH of the earlier expenses

This is the mobile era in which we are living where everyone wants to do things on the go. Therefore,

We made it Responsive so that it could work on any device & is User-Friendly

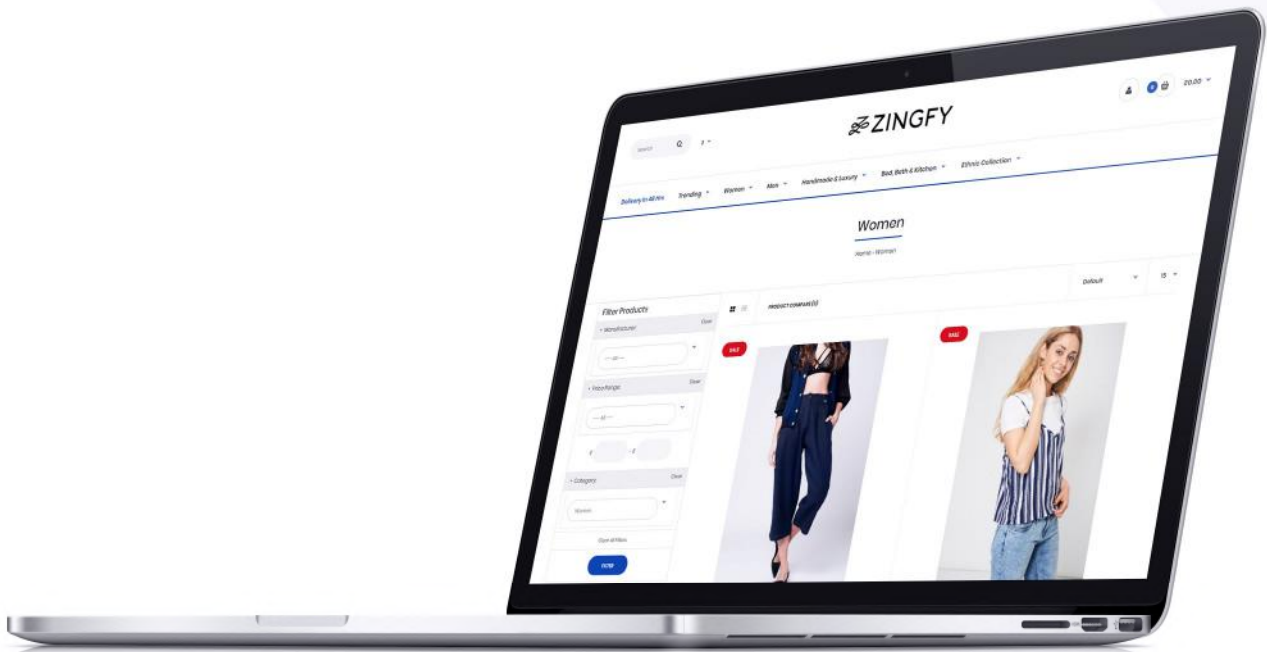

Websites like this need lots of data so that workflow runs smoothly between sellers & buyers

It is built to Secure all the data
Eliminating any chance of Data-Theft

There are lots of products and lots of categories
to choose from. But what if one can't find anything easily

We created a powerful Search engine
for it & it Smartly provides result

So what we did with this project in
a nut shell is that we did a

Complete transformation of the website
giving a better shopping experience
